AWWWARDS SITE OF THE DAY

HTC Viverse: Connecting individuals and communities together in the metaverse.

We're excited to propose the development of an interactive website that immerses users in the HTC VIVE universe, known as the "VIVERSE." This virtual world is comprised of a rotating galaxy, with each planet representing a unique location within the VIVERSE. These planets offer a diverse range of experiences, from immersive scenery to interactive storytelling. To bring this vision to life, we plan to utilize the power of WebGL to create an engaging, visually-stunning website that truly captures the spirit of the VIVERSE. This innovative and creative website will provide a unique experience for users and showcase the capabilities of the HTC Vive ecosystem.

Color Palette

VIVE's color palette is focused, bold and approachable. This is to accommodate its unique business entities and brand alike.

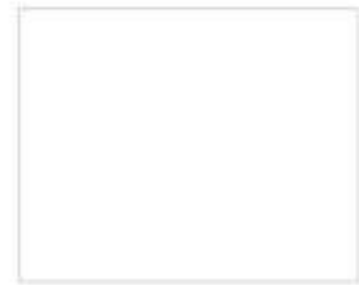

PANTONE COLORS

Pantone 306

PROPORTIONAL USAGE

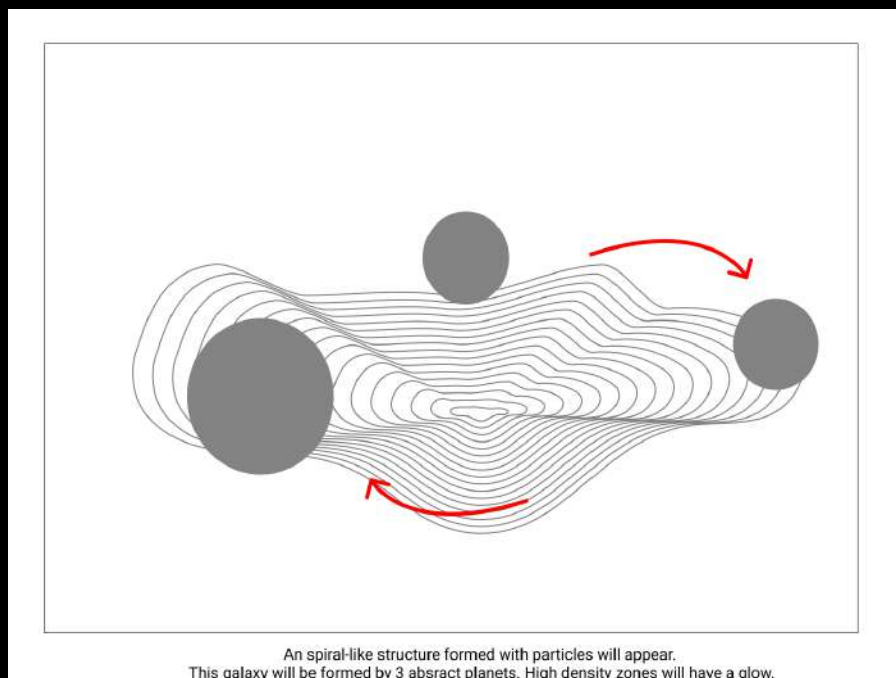

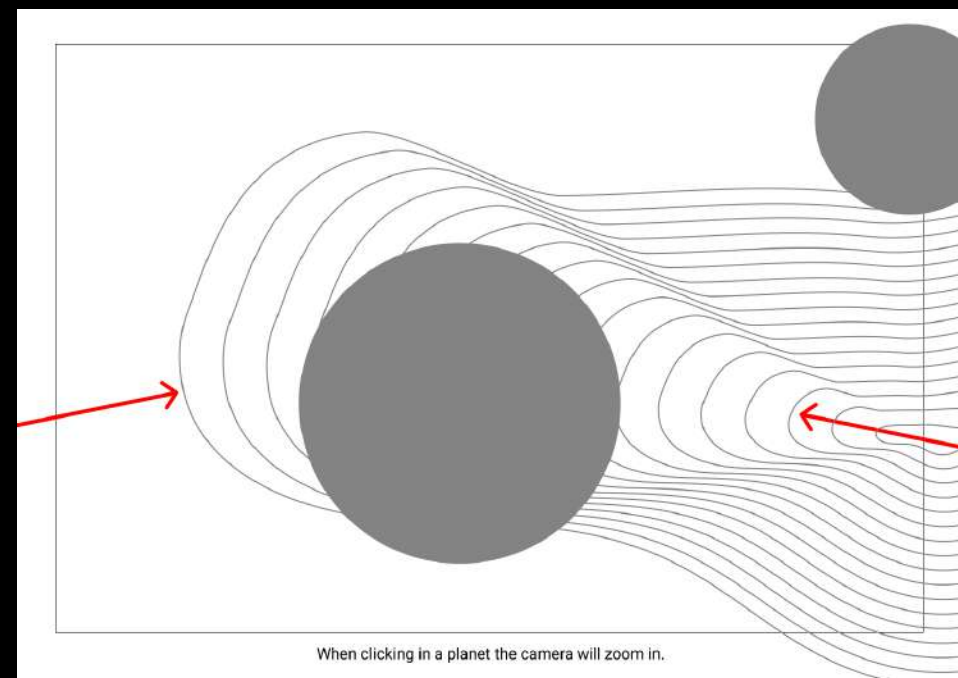

OHZI INTERACTIVE

PROPOSAL

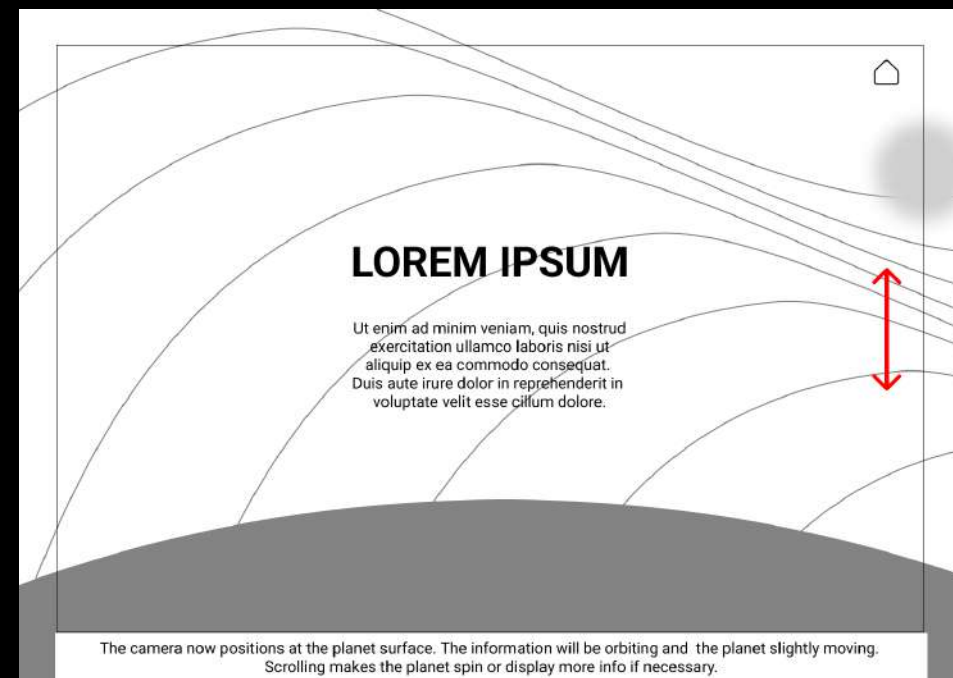

OUR PROPOSAL

An spiral-like structure formed with particles will appear.
This galaxy will be formed by 3 abstract planets. High density zones will have a glow.

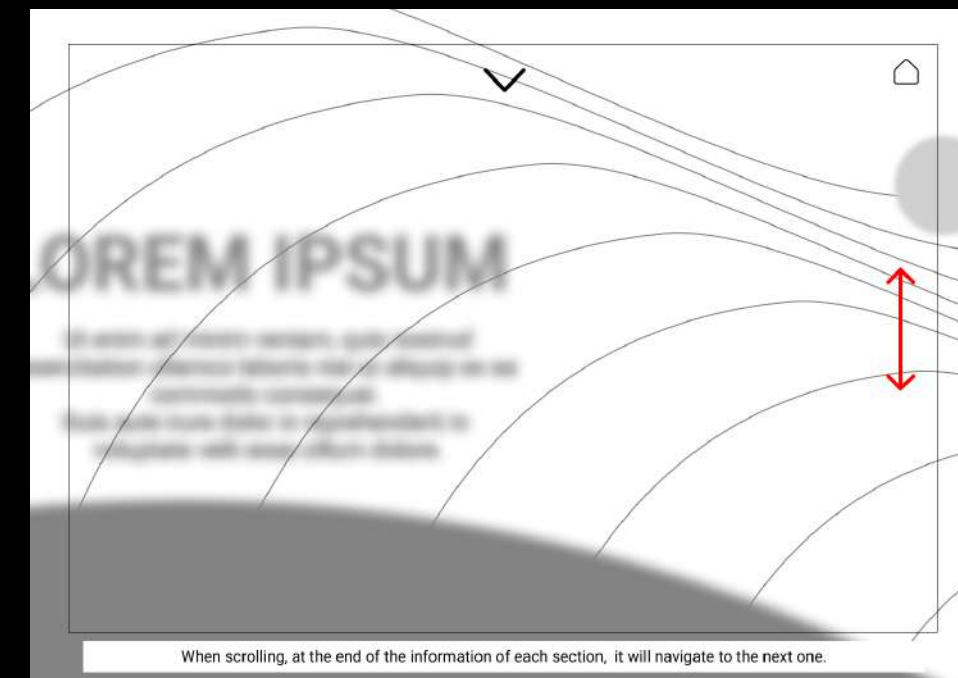

When clicking in a planet the camera will zoom in.

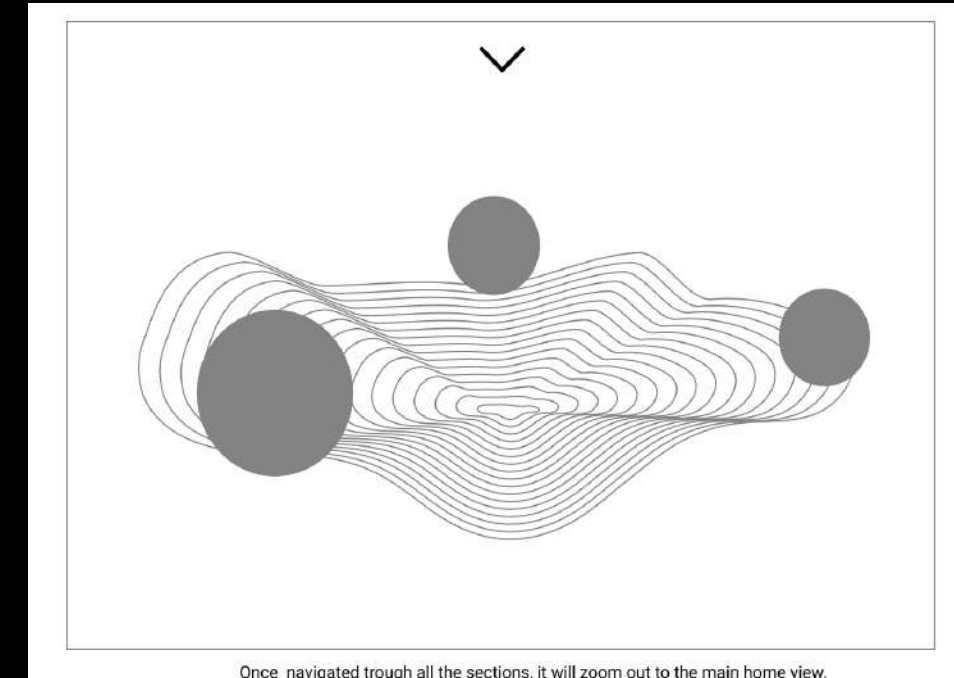

LOREM IPSUM

Ut enim ad minim veniam, quis nostrud
exercitation ullamco laboris nisi ut
aliquip ex ea commodo consequat.
Duis aute irure dolor in reprehenderit in
voluptate velit esse cillum dolore.

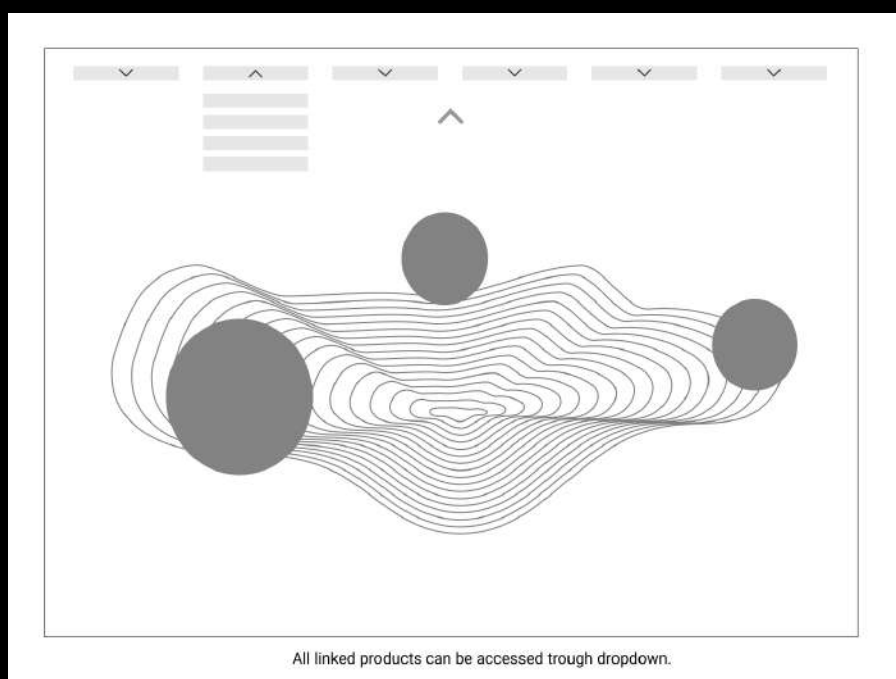

The camera now positions at the planet surface. The information will be orbiting and the planet slightly moving.
Scrolling makes the planet spin or display more info if necessary.

When scrolling, at the end of the information of each section, it will navigate to the next one.

Once navigated trough all the sections, it will zoom out to the main home view.

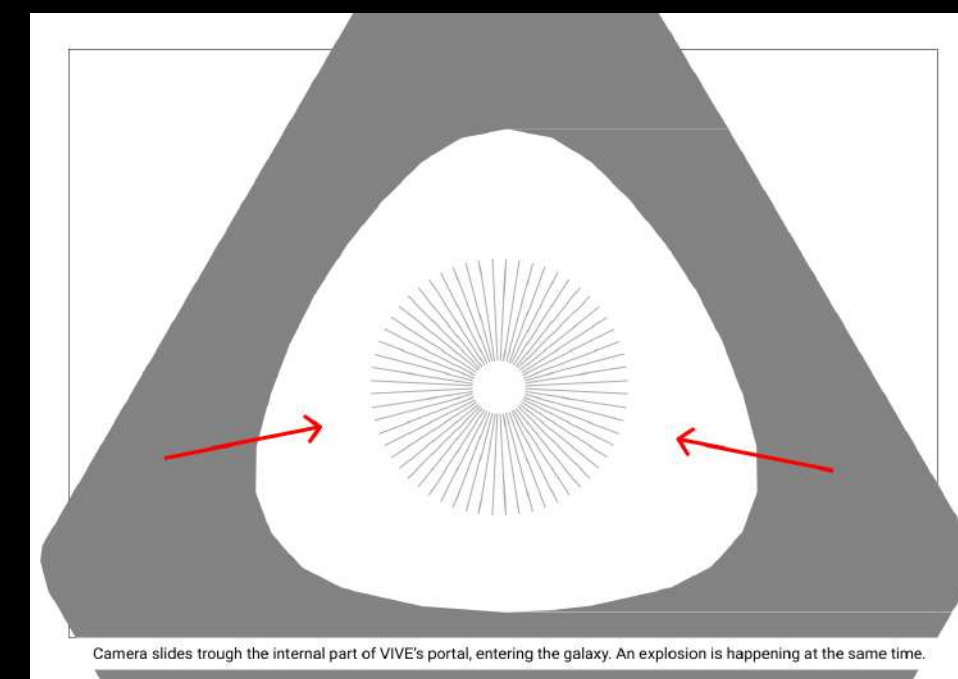

All linked products can be accessed trough dropdown.

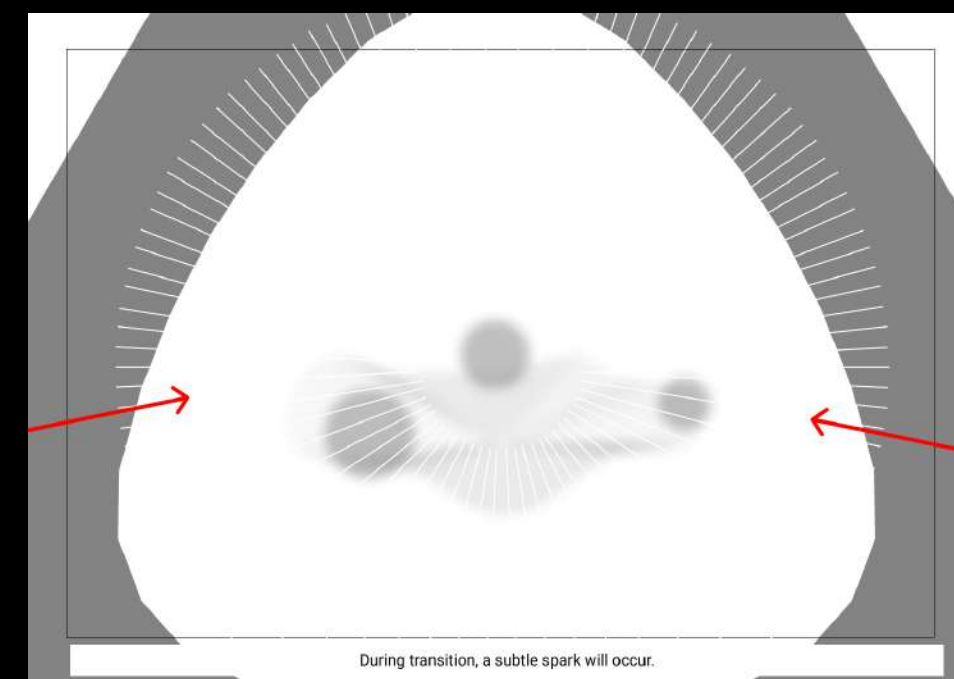

The site initates with VIVE's logo animation. The experience starts with a button.

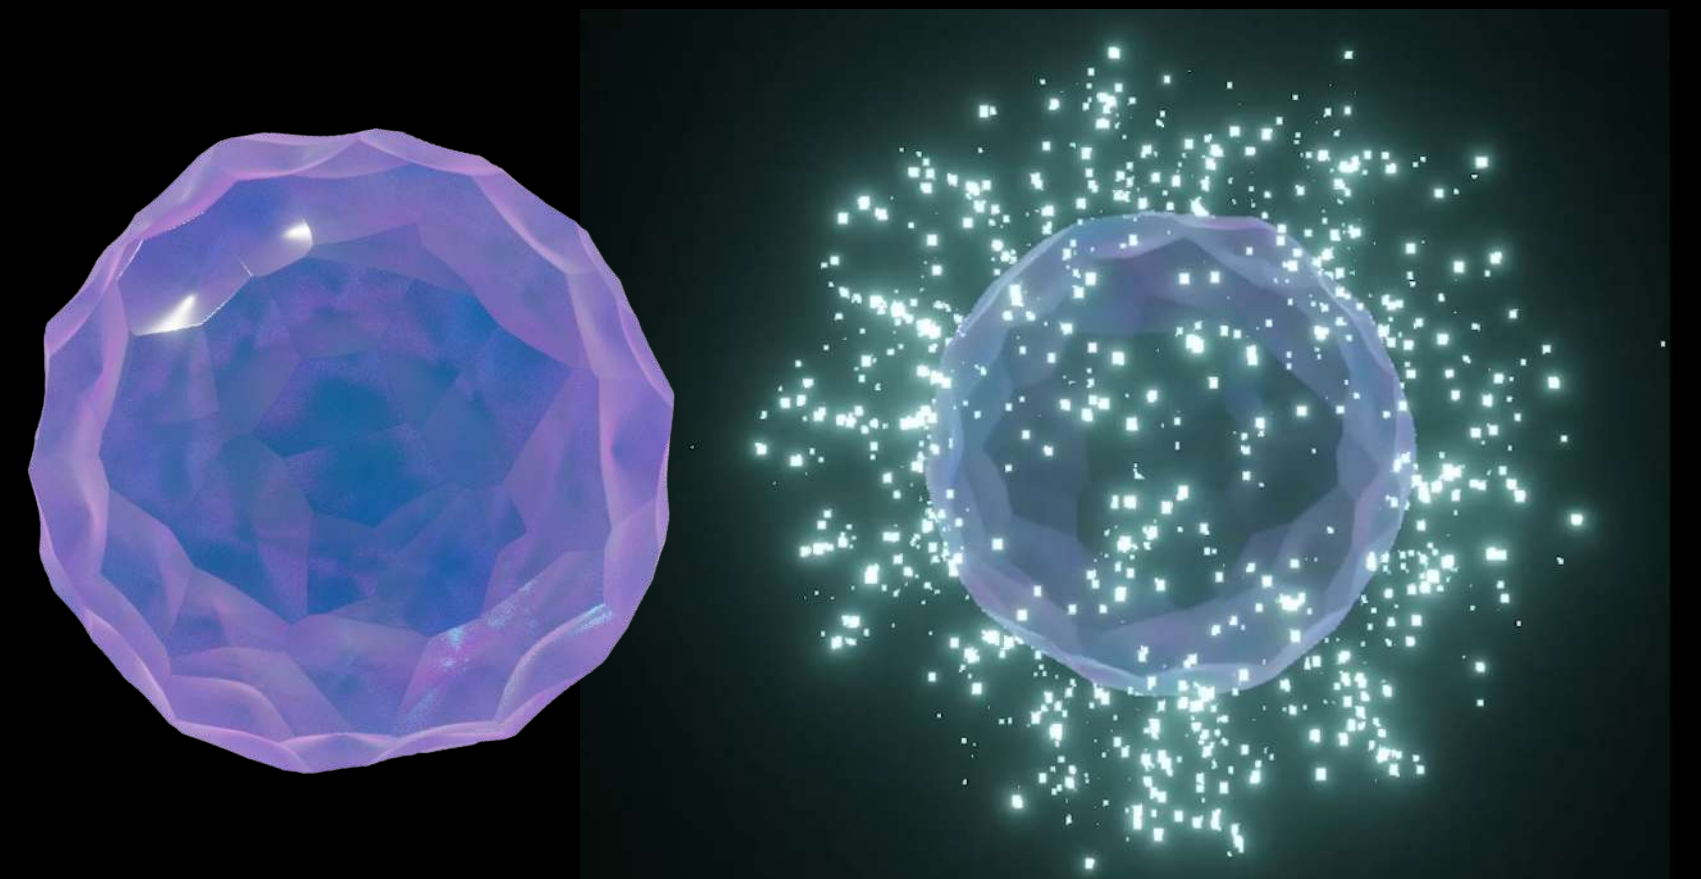

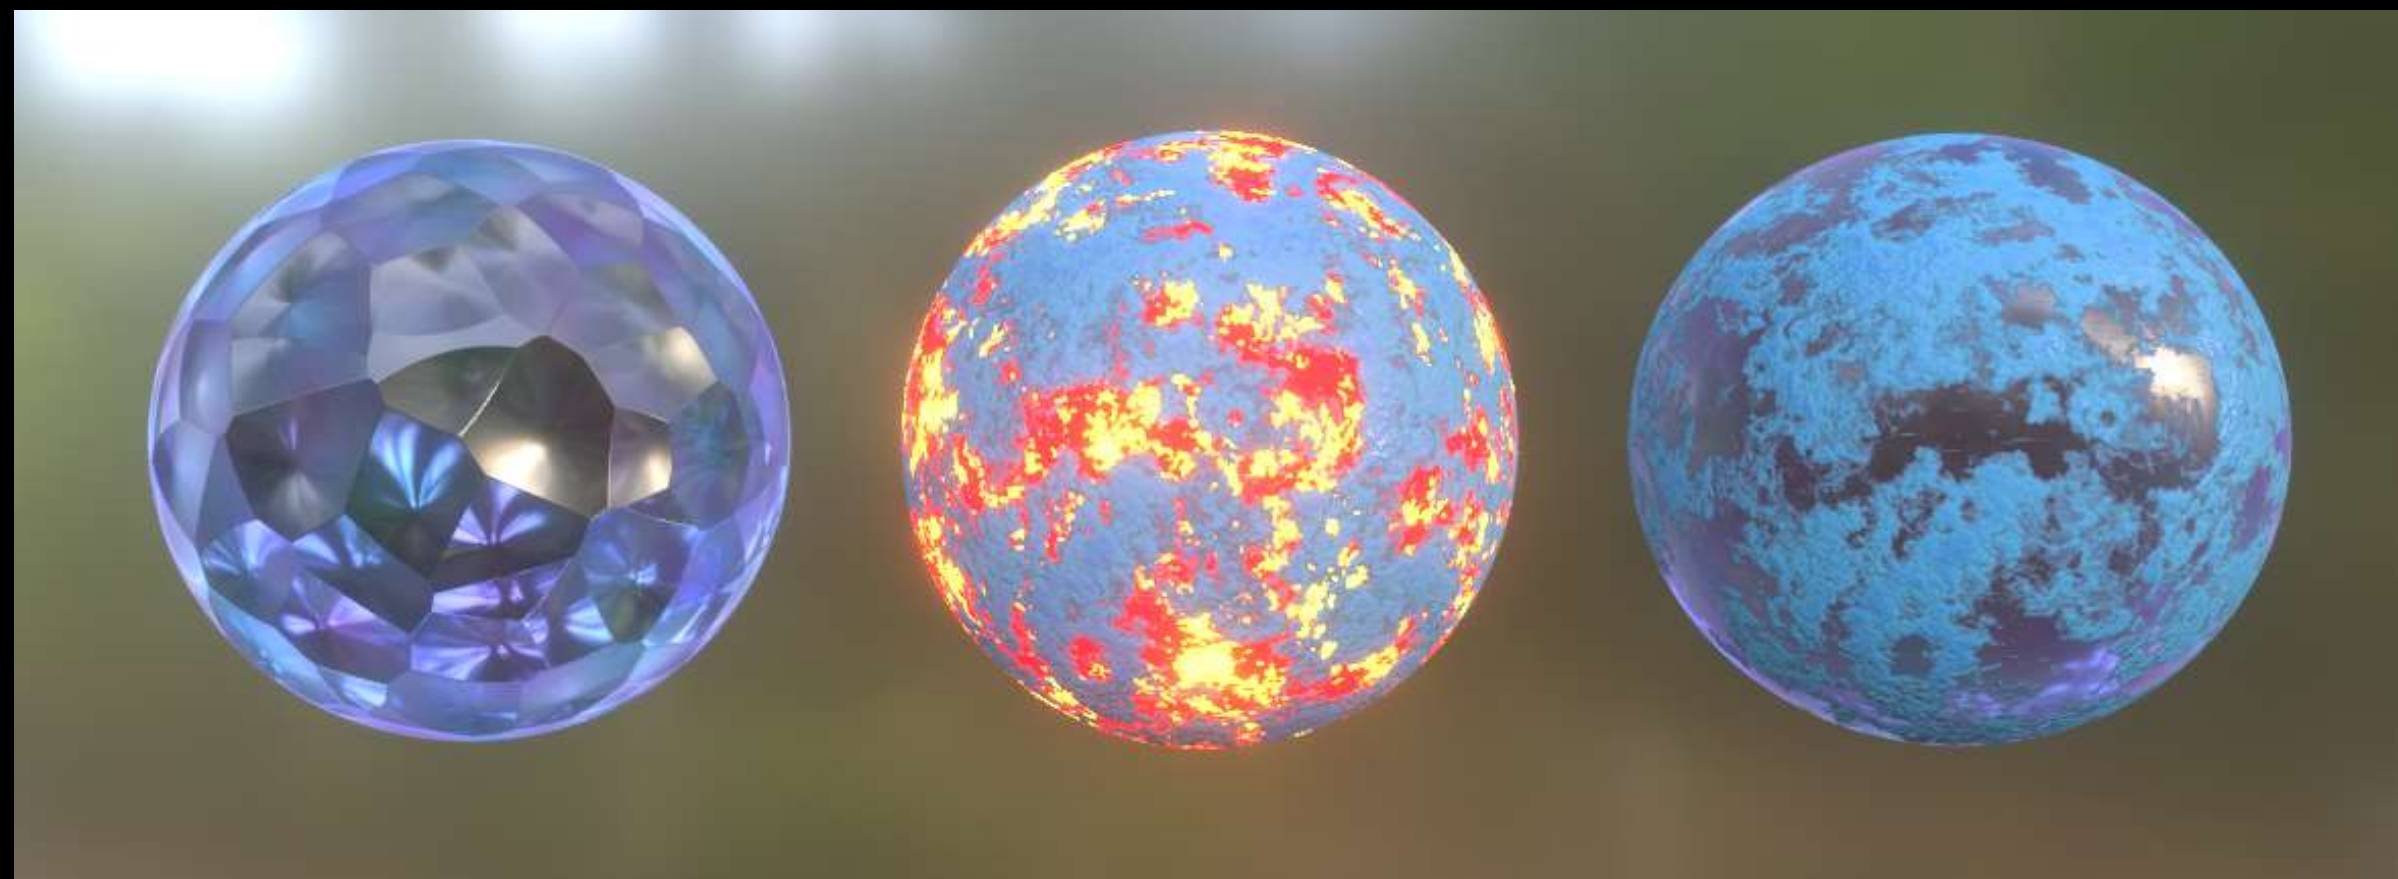

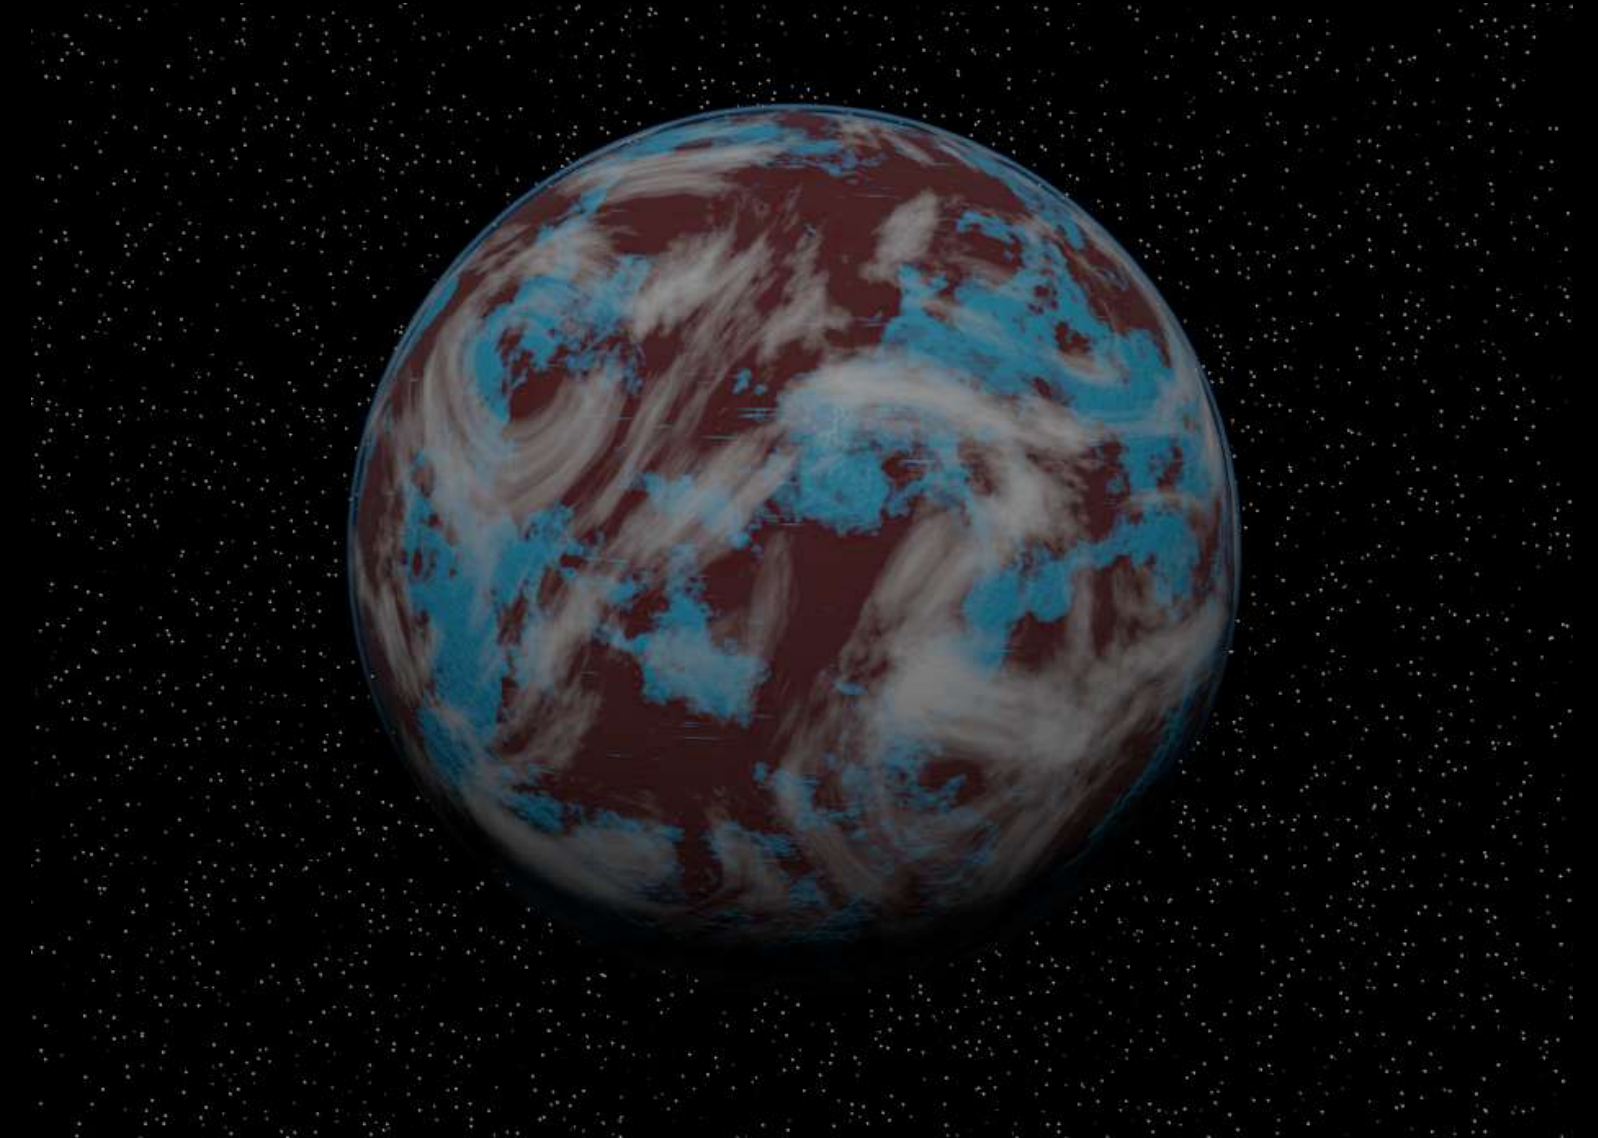

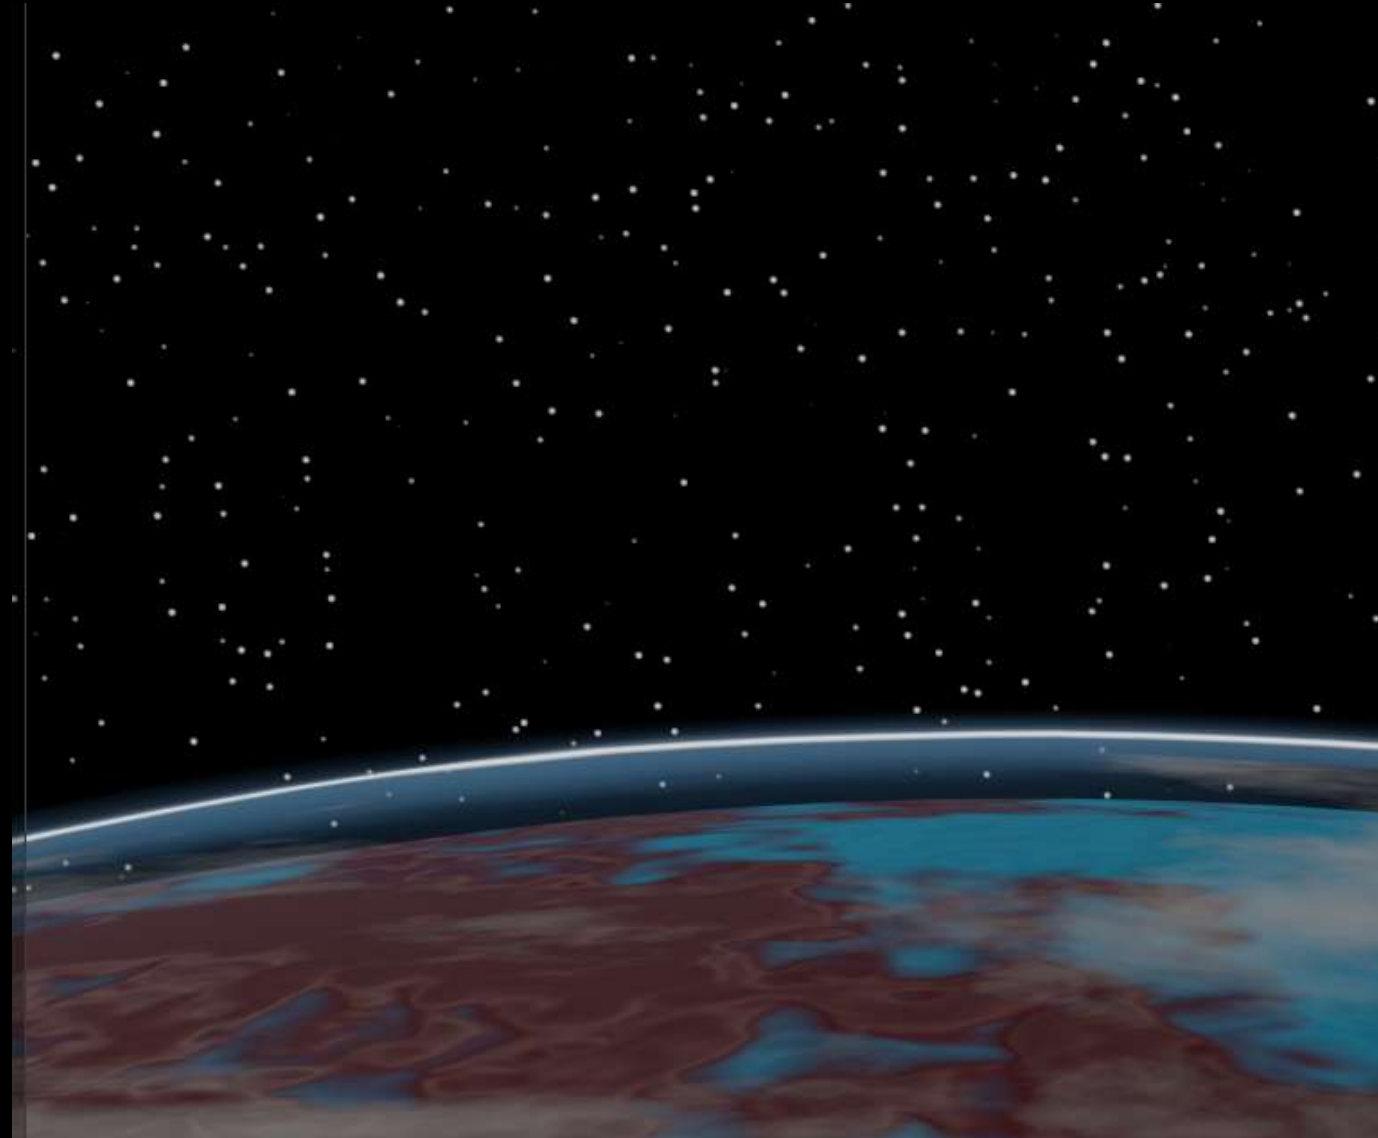

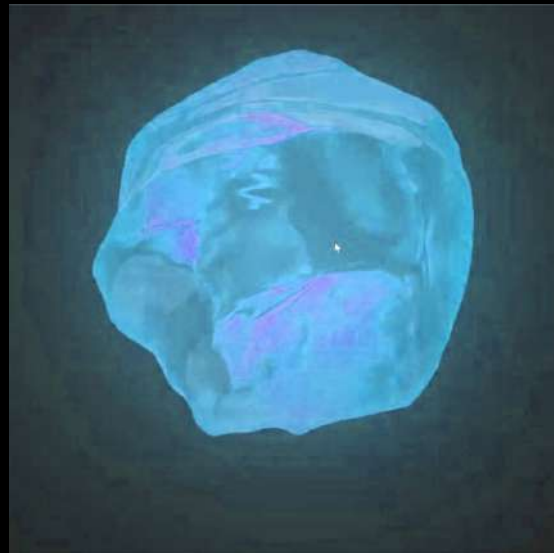

Starts with a 2D dynamic and trough interaction it turns into a 3D logo.

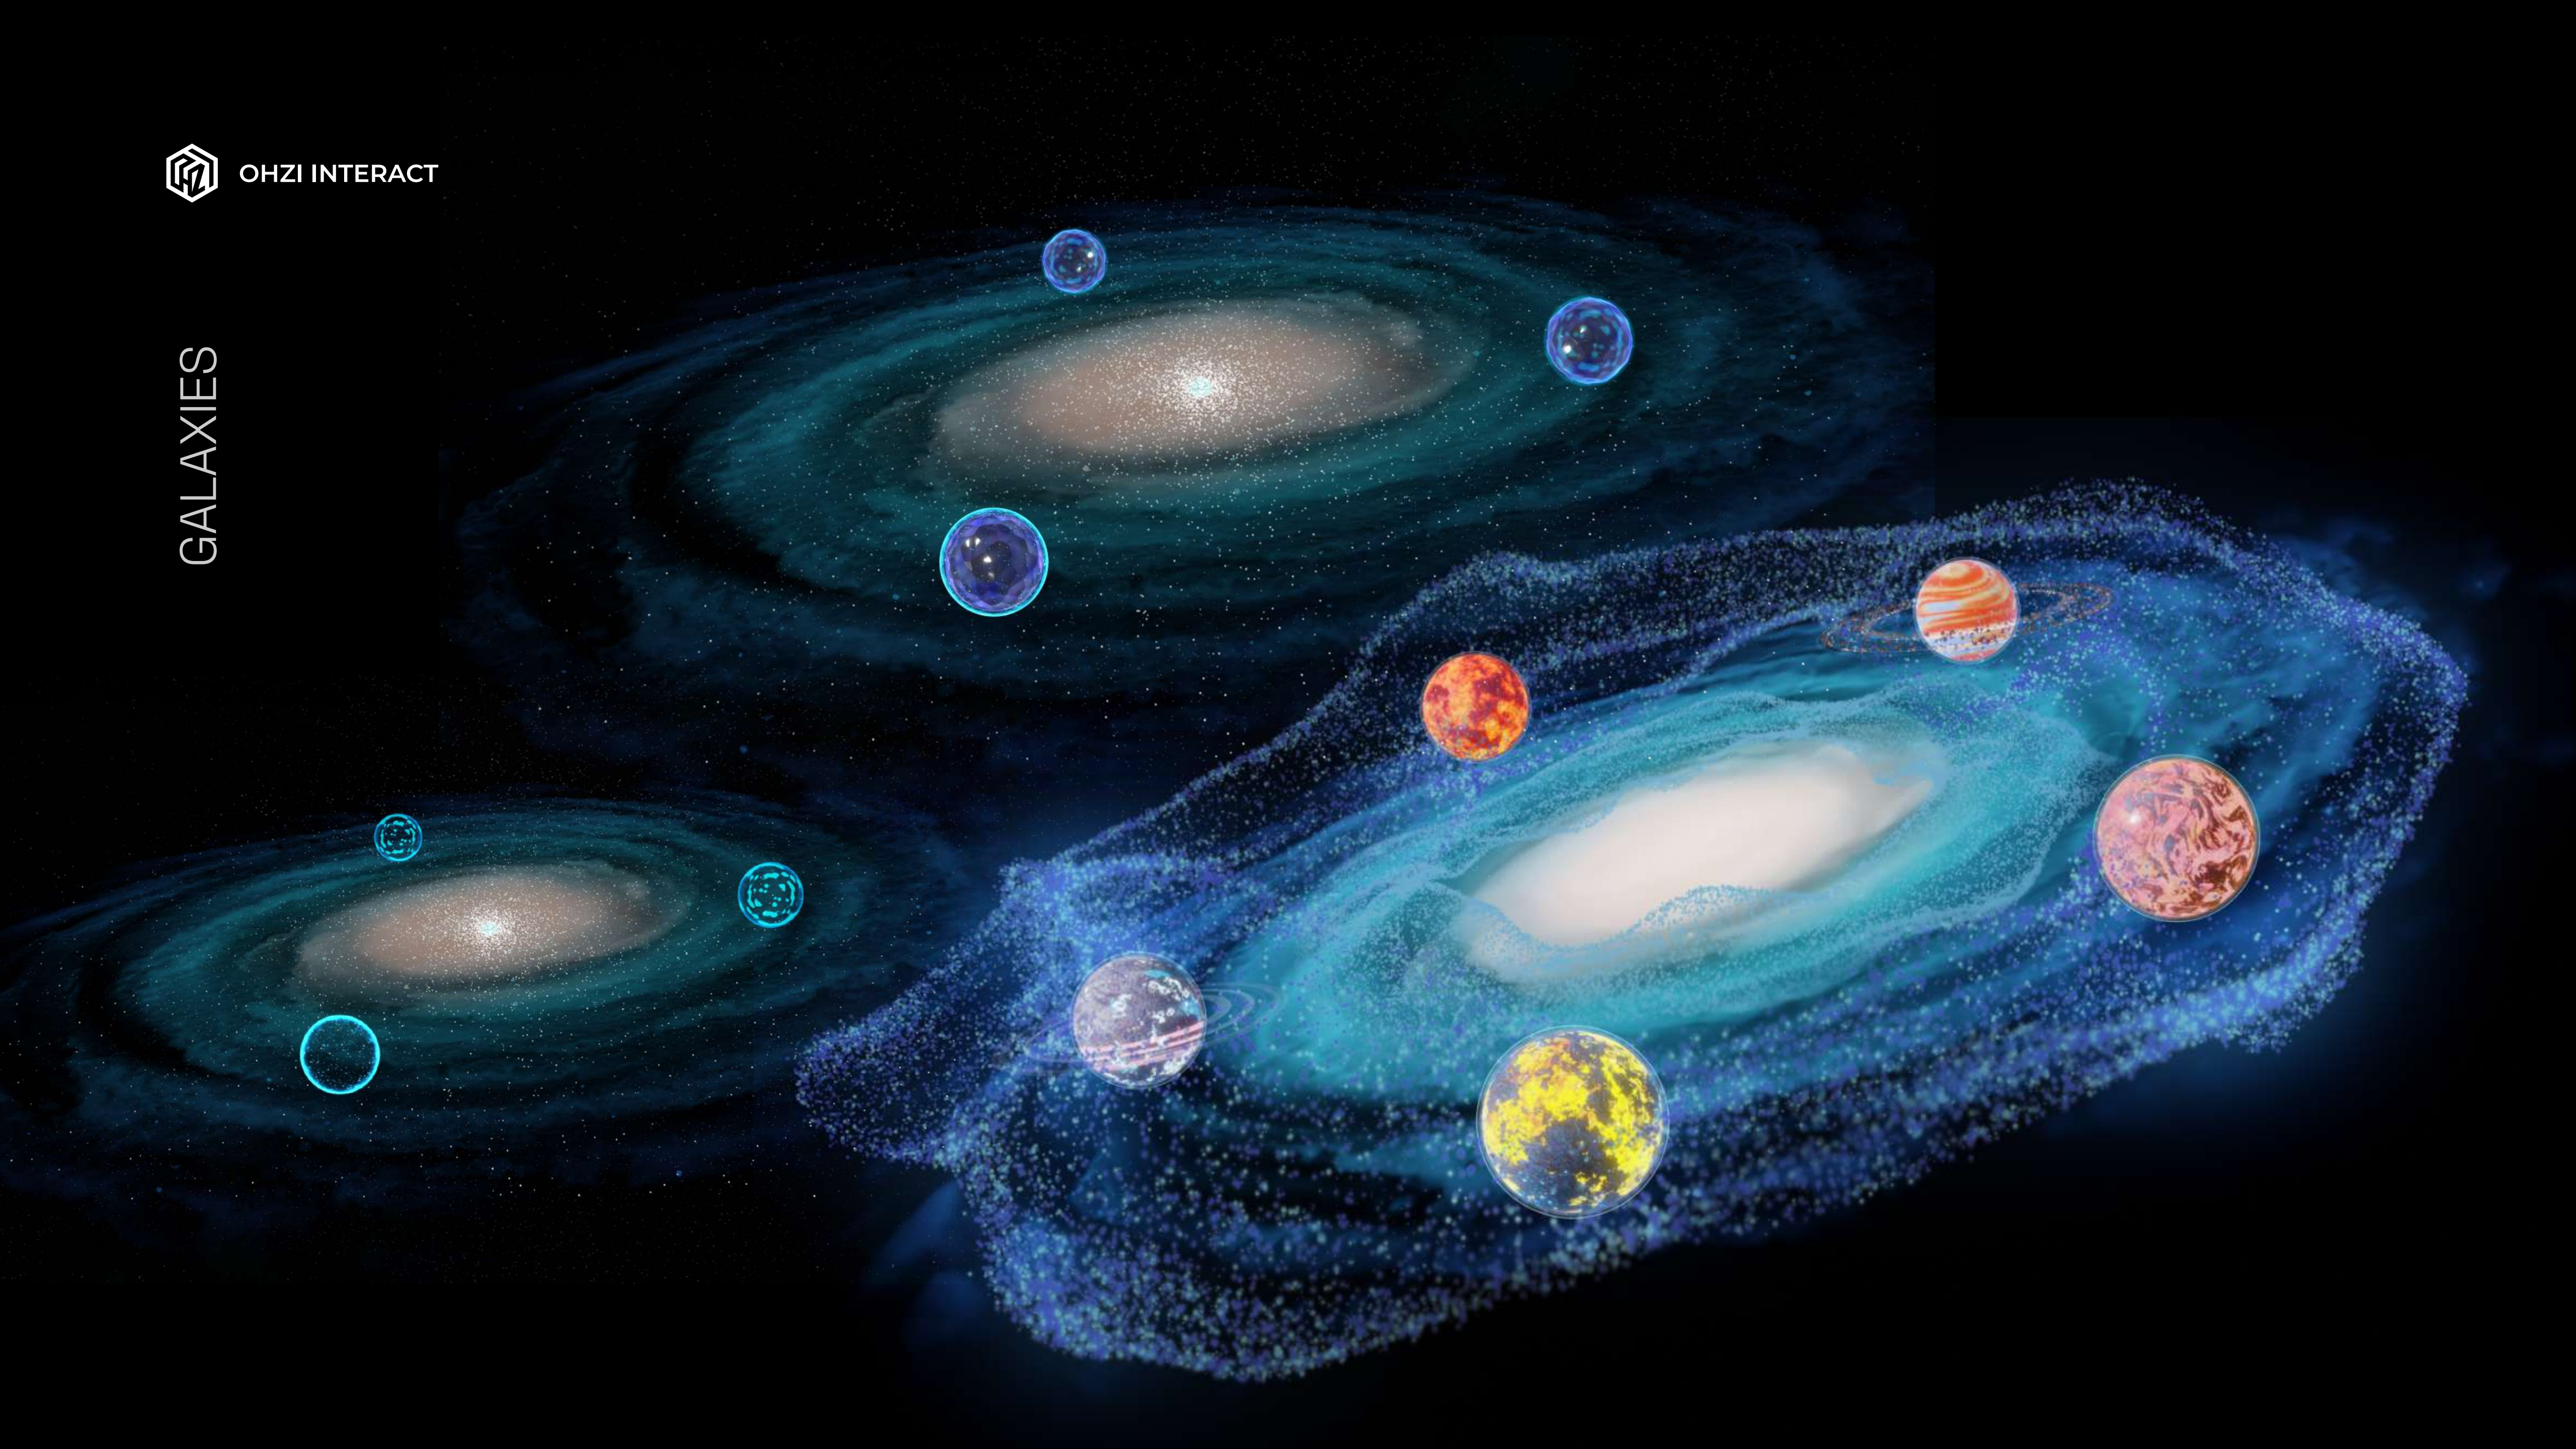

Camera slides trough the internal part of VIVE's portal, entering the galaxy. An explosion is happening at the same time.

During transition, a subtle spark will occur.

LOGO

WHO WE ARE

Viverse is here to connect people from all walks of life to an open and accessible virtual world.

Through this new form of living, everyone is empowered to explore, work and play in a safe environment; each experience is unique and your transactions and data are secure.
